COMMON MISTAKES

X Not enrolling within 14 days
-> You owe premiums retroactively from the eligibility date, but medical expenses during the gap are not covered.

X Forgetting to disenroll from NHI after getting employer insurance
-> You will be double-billed for premiums. NHI does not automatically cancel.

X Not bringing the Certificate of Health Insurance Loss
-> The ward office cannot process your enrollment. Ask your former employer to issue this document.

AFTER YOU SUBMIT

1. You receive a qualification confirmation document (資格確認書) — keep this as proof of insurance
2. Monthly premium notices arrive by mail. Pay at convenience stores, banks, or set up auto-debit
3. Dependents can be enrolled on the same form — list all household members
4. Premiums are calculated based on your previous year's income

Form p.1

セクション 2 — Section 2

	BMI		
血圧	収縮期血圧（mmHg）		
	拡張期血圧（mmHg）		
血中脂質検査 ※1 空腹時中性脂肪または随時中性脂肪のいずれかを記入してください。 ※2 LDLコレステロールまたはNON－HDLコレステロールのいずれかを記入してください	空腹時中性脂肪（mg/dl）		※1
	随時中性脂肪（mg/dl）		
	HDLコレステロール（mg/dl）		
	LDLコレステロール（mg/dl）		※2
	（NON－HDLコレステロール（mg/dl））		
肝機能検査	AST（GOT）（U/l）		
	ALT（GPT）（U/l）		
	γ－GT（γ－GTP）（U/l）		

1. **収縮期血圧 (mmHg)** Systolic blood pressure (mmHg)
   Enter your systolic blood pressure measurement in mmHg (the higher number when blood pressure is taken). If you don't know this value, you can get it measured at any clinic or pharmacy in Japan.

2. **拡張期血圧 (mmHg)** Diastolic blood pressure (mmHg)
   N/A - this appears to be medical form text, not typical content for a residence registration form

3. **空腹時中性脂肪 (mg/dl)** Fasting triglycerides (mg/dl)
   Write your fasting triglyceride level in mg/dl from a recent blood test taken after not eating for 8-12 hours. This value is usually included in annual health checkups.

4. **血中脂質検査** Blood lipid test
   N/A if it's just instructions/layout text

5. **随時中性脂肪 (mg/dl)** Random triglycerides (mg/dl)
   N/A - this appears to be medical data that doesn't belong on a residence registration form and may be misplaced text

6. **HDLコレステロール (mg/dl)** HDL Cholesterol (mg/dl)
   Enter your HDL cholesterol level in mg/dl from a recent blood test. HDL is the 'good' cholesterol, and this value is typically part of a lipid panel.

7. **LDLコレステロール (mg/dl)** LDL Cholesterol (mg/dl)
   Write your LDL cholesterol level in mg/dl from blood test results. LDL is the 'bad' cholesterol - if you only have total cholesterol, you may need to calculate this or request a detailed lipid panel.

8. **NON-HDLコレステロール (mg/dl)** Non-HDL Cholesterol (mg/dl)
   Enter your non-HDL cholesterol level in mg/dl, which is total cholesterol minus HDL cholesterol. You can calculate this yourself if your blood test doesn't specifically list non-HDL.

9. **AST (GOT) (U/l)** AST (GOT) (U/l)
   Write your AST (also called GOT) level in U/l from liver function blood tests. This enzyme indicates liver health and is standard in comprehensive blood panels.

10. **ALT (GPT) (U/l)** ALT (GPT) (U/l)
    Enter your ALT (also called GPT) level in U/l from blood test results. This is another liver enzyme that's commonly tested alongside AST.

1. **空腹時血糖 (mg/dl)** Fasting blood glucose (mg/dl)

2. **HbA1C (NGSP値) (%)** HbA1C (NGSP value) (%)
   Write your HbA1C percentage using NGSP standardized values from your blood test (normal is below 5.7%). This shows your average blood sugar over the past 2-3 months.

5. **随時血糖 (食直後) (mg/dl)** Random blood glucose (immediately after meal) (mg/dl)
   Write your blood glucose level in mg/dl taken immediately after eating a meal. This is an alternative if you only have post-meal test results available.
